PROFESSIONAL SUMMARY

Software engineer with 8+ years building user-facing products end to end, from first prototype to production at scale. Builds interfaces with TypeScript, Angular, HTML, CSS and Flutter, integrated with REST APIs and serverless backends on Firebase and Supabase. Co-founded and led engineering at Blu Studios, where products reached 12M+ downloads worldwide, and co-led remote teams of up to 14 people. Brings AI into both the product and the workflow: shipped a voice-enabled AI help assistant in a production app, and builds AI-first every day with Claude Code, project context files, reusable skills and MCP tool integrations.

PROFESSIONAL EXPERIENCE

Full-Stack Engineer | 66degrees (Contract)

Aug 2026 - Present | Remote

- Work across full-stack engineering with a focus on Flutter and mobile product development.

Senior Flutter Engineer | Arc.dev (Freelance)

Mar 2026 - Aug 2026 | Remote

- Rebuilt a production FlutterFlow app in native Flutter, replacing a constrained low-code implementation with redesigned UX and modular architecture.
- Built a voice-enabled AI help assistant: users type or record a question and get an answer from Gemini, called through Supabase Edge Functions and grounded in product guidance and event FAQs.
- Built an integrated admin console for events, teams, sponsors, charities, and organizers, with role-based and event-specific permissions.
- Delivered Apple Health and Health Connect sync, challenge flows, community features, and event leaderboards; validated row-level security across 14 production database tables.
- Supported the iOS and Android production launch with automated tests, CI/CD, and App Store and Google Play release workflows.

Co-founder and Senior Flutter Engineer | Blu Studios (Self-employed)

Mar 2019 - Mar 2026 | Hybrid

- Led end-to-end engineering for mobile games and apps from concept through live operations; products reached 12M+ downloads worldwide, including titles with 5M+ downloads.
- Designed scalable Flutter architecture for Android and iOS and co-led remote teams of up to 14 people.
- Shipped Cappy, an AI-powered self-care app with conversational features built on OpenAI APIs.
- Reduced ANR from about 30% to under 2%, reduced APK size by 45%, and improved D1 retention from about 25% to about 40% through profiling and product iteration.
- Built Live Ops and monetization systems with Firebase Remote Config and A/B testing. Contributed to products recognized through Google Play Best of 2021, Indie Games Fund 2023, and Indie Games Accelerator 2024.

Desktop Developer | VX Case

Oct 2018 - Mar 2019 | Salvador, Brazil

- Built enterprise e-commerce and retail applications with TypeScript, Angular and VTEX, including reusable UI components and front-end to back-end integration.

SELECTED PROJECTS

Movement Challenge App | Arc.dev | Mar 2026 - Aug 2026

Rebuilt a production app in native Flutter; delivered health-data sync, event leaderboards, a moderated community feed, an admin console, and a voice-enabled AI help assistant.

Rabit | Blu Studios | Jan 2020 - Apr 2025

Habit tracker with 5M+ downloads, featured in Google Play Best of 2021; built engagement features including notifications, streak logic, Firestore sync, and animated UI.

Capy | Blu Studios | May 2024 - Dec 2025

AI-powered self-care app combining a virtual pet, habit tracking, mood journaling, and conversational features built with OpenAI APIs.

Magic Sort | Blu Studios | Jan 2024 - Feb 2026

Hybrid casual puzzle game with 1M+ downloads, selected for the Google Play Indie Games Accelerator 2024; focused on Flutter performance, low-end Android stability, and Live Ops monetization.

CORE SKILLS

Front-end and web: TypeScript, JavaScript, Angular, HTML, CSS, responsive UI, reusable components, VTEX, WordPress, PHP

Mobile: Flutter, Dart, Android, iOS, BLoC, Cubit, Riverpod, unit and widget testing

Back end and data: Firebase (Auth, Firestore, Cloud Functions, Storage), Supabase, Edge Functions, REST APIs, WebSockets, row-level security

AI: Claude Code (daily), project context files, reusable skills, MCP tool integrations, reviewing and debugging AI-generated code, Gemini and OpenAI APIs in production features

Delivery: CI/CD, Codemagic, Fastlane, automated testing, performance profiling

EDUCATION AND CERTIFICATIONS

- Software Engineering coursework | Universidade Católica do Salvador | 2017 - 2019
- Tecnólogo (higher-education diploma) in Computer Networks | SENAI CIMATEC | 2017 - 2018
- Top 3% Talent, Verified by Toptal | Toptal
- Arc Certified Remote Developer | Arc.dev

LANGUAGES

English: Full professional proficiency | Portuguese: Native or bilingual proficiency
