PROFESSIONAL SUMMARY

Software engineer with 8+ years shipping production products, now focused on AI-enabled features and AI-first engineering. Shipped a voice-enabled AI help assistant in a production iOS and Android app, using Gemini through Supabase Edge Functions and grounded in a product knowledge base. Works with Claude Code every day, using project context files, reusable skills and MCP tool integrations to plan, build, review and debug code. Co-founded and led engineering at Blu Studios, where products reached 12M+ downloads worldwide, and co-led remote teams of up to 14 people. Takes ideas from first prototype to live product with Flutter, TypeScript, Angular, Firebase and Supabase.

PROFESSIONAL EXPERIENCE

Full-Stack Engineer | 66degrees (Contract)

Aug 2026 - Present | Remote

- Work across full-stack engineering with a focus on Flutter and mobile product development.

Senior Flutter Engineer | Arc.dev (Freelance)

Mar 2026 - Aug 2026 | Remote

- Built a voice-enabled AI help assistant: users type or record a question and get an answer from Gemini, called through Supabase Edge Functions and grounded in product guidance and current event FAQs.
- Rebuilt a production FlutterFlow app in native Flutter, replacing a constrained low-code implementation with redesigned UX and modular architecture.
- Built an integrated admin console for events, teams, sponsors, charities, and organizers, with role-based and event-specific permissions.
- Delivered Apple Health and Health Connect sync, challenge flows, community features, and event leaderboards; validated row-level security across 14 production database tables.
- Supported the iOS and Android production launch with automated tests, CI/CD, and App Store and Google Play release workflows.

Co-founder and Senior Flutter Engineer | Blu Studios (Self-employed)

Mar 2019 - Mar 2026 | Hybrid

- Led end-to-end engineering for mobile games and apps from concept through live operations; products reached 12M+ downloads worldwide, including titles with 5M+ downloads.
- Shipped Cappy, an AI-powered self-care app with conversational features built on OpenAI APIs.
- Designed scalable Flutter architecture for Android and iOS and co-led remote teams of up to 14 people.
- Reduced ANR from about 30% to under 2%, reduced APK size by 45%, and improved D1 retention from about 25% to about 40% through profiling and product iteration.
- Built Live Ops and monetization systems with Firebase Remote Config and A/B testing. Contributed to products recognized through Google Play Best of 2021, Indie Games Fund 2023, and Indie Games Accelerator 2024.

SELECTED PROJECTS

Movement Challenge App | Arc.dev | Mar 2026 - Aug 2026

Production app rebuilt in native Flutter with a voice-enabled AI help assistant (Gemini via Supabase Edge Functions), health-data sync, event leaderboards and a moderated community feed.

Capy | Blu Studios | May 2024 - Dec 2025

AI-powered self-care app combining a virtual pet, habit tracking, mood journaling, and conversational features built with OpenAI APIs.

Rabit | Blu Studios | Jan 2020 - Apr 2025

Habit tracker with 5M+ downloads, featured in Google Play Best of 2021; built engagement features including notifications, streak logic, Firestore sync, and animated UI.

Magic Sort | Blu Studios | Jan 2024 - Feb 2026

Hybrid casual puzzle game with 1M+ downloads, selected for the Google Play Indie Games Accelerator 2024; focused on Flutter performance, low-end Android stability, and Live Ops monetization.

CORE SKILLS

AI engineering: Claude Code (daily), project context files, reusable skills, MCP tool integrations, prompt and context design, reviewing and debugging AI-generated code, Cursor, ChatGPT

AI product integration: Gemini, OpenAI APIs, Supabase Edge Functions, grounded answers from a product knowledge base, voice-enabled product experiences

Product engineering: Flutter, Dart, TypeScript, Angular, HTML, CSS, JavaScript, REST APIs, WebSockets, Android, iOS

Architecture and delivery: Clean Architecture, modular and feature-first design, Firebase, Firestore, Supabase, CI/CD, Codemagic, Fastlane, automated testing, performance profiling

EDUCATION AND CERTIFICATIONS

- Software Engineering coursework | Universidade Católica do Salvador | 2017 - 2019
- Tecnólogo (higher-education diploma) in Computer Networks | SENAI CIMATEC | 2017 - 2018
- Top 3% Talent, Verified by Toptal | Toptal
- Arc Certified Remote Developer | Arc.dev

LANGUAGES

English: Full professional proficiency | Portuguese: Native or bilingual proficiency
